### Description

Coming from a hybridization of Hosta Bottom line.

Height : about 25/35 cm.

Width : about 45/65 cm.

Dimensions of the leaves : about 22 x 16 cm.

This variety has large oval yellow/green leaves with very corrugated sides.

Another particularity : the base of the petioles has red tones. The corrugated aspect and the texture of the bumpy leaf give much charm to this variety.

Lavender color flowers in summer.

**Big rhizome delivered in a 1 liter plastic pot.**
