

## Pinus thunbergii 'kotobuki'

*Kuro matsu kotobuki*

ref. 103 

[\[+\] Show on the website](#)

### Description

Tree produced by grafting.

Delivered in a plastic pot: Ø 16 \* 12cm.

Height of the tree only: 20-30 cm.

Trunk Ø 1 cm.

A variety of rare black pine, pinus thunbergii 'Kotobuki' is an ideal species to turn into a bonsai thanks to its thin needles. The photos show the kind of fine tree it can grow into after many years. It can be repotted into a non-enamelled pot once it's had time to develop. Potted in 09-2022 don't touch root ball before 09-2023.
