Hosta high society

ref. 11065

[\[+\] Show on the website](#)

Description

Coming from a hybridization of Hosta June.

Height : about 30/40 cm.

Width : about 50/60 cm.

Dimensions of the leaves : about 13x10 cm.

Oval shaped leaves with a creamy white center that forms an irregular stain mixed with apple green tones and dark green leaf sides.

The center of the leaf turns to creamy white as the season goes on. The variegation is a mix of 3 color tones and is very original because it gives the impression of paintbrush touches apple green color in the center and on the sides.

Small blue/purple flowers in summer.

Big rhizome delivered in a 1 liter plastic pot.
