Description

Japanese garden lantern in real granite, height 200 cm. Hat width: Ø 80*50 cm height centimeters. The hexagonal cage measures: Ø 40*30 cm in height. The hexagonal shaped piece under the cage measures: Ø 55*20 thick. Column of +- Ø 30*60 cm in height. Weight 680 kilos in 6 elements. The elements are drilled allowing to pass an electric wire to illuminate this lantern. A small element in the shape of a lotus flower bud caps the hat. It measures: Ø 25*22 cm in height. The pedestal measures: 70*70*20 thick.

The shaping grain of granite is pineapple skin type. Our garden éléments (basins, granite lanterns, stones and stepping stones) are generally stored outdoors. Indeed the patina and the old aspect thus obtained (lichens and mosses) bring an additional character of authenticity generally very appreciated in the art of the traditional Japanese garden.
