Description

Spare 37 mm grid for our watering spouts ref 10978 and 10979 and 10980 The holes are pierced with a lazer resulting in an even and regular jet of water more appropriate for bonsai. Clean impurities in the grid regularly to prevent clogging and once a month, depending on how much limestone is in your water, use a descaling solution (like the one you'd use for a coffee pot).

Our watering can roses are handcrafted and may therefore show slight irregularities that reflect their manual production.
