## Description

In spring, the young leaves emerge in a beautiful soft green with bright red margins, before quickly turning entirely light green. During summer, the foliage takes on a delicately crinkled appearance, reminiscent of the Shishigashira variety. Autumn reveals its full splendor as the leaves turn a deep, vibrant scarlet red.
Acer palmatum 'Kinky Krinkle' is a still relatively unknown Japanese maple, selected by Talon Buchholz of Buchholz & Buchholz Nursery in Oregon, USA. It stands out for its upright, elegant habit and finely textured foliage. The leaves are curled along the edges and finely serrated.

## Technical description

| | |
|---|---|
| *Species* | Acer palmatum |
| *Variety* | Kinky krinkle |
| *Leaf colour* | Green leaves |
| *Leaf shape* | Made tense |
| *Adult height* | Between 2 and 4 meters |
| *Shape* | Compact |
| *Exposure* | Sun |
