### Description

Height of the tallest tree: 750 mm.

Branch spread: 980 mm. High-quality antique handmade Japanese unglazed pot measuring 720 x 470 x 95 mm. Naturally short, fine needles. Ikadabuki (turtle-back raft) style, with all trunks originating from the same root base. Bonsai over 80 years old, with perfectly developed bark. Collected as yamadori more than 40 years ago. Well ramified, with good trunk taper. No grafting marks, as it is a natural seedling, and no major wire scars or large pruning wounds. Trunk diameters range from approximately 15 mm to 50 mm at the nebari. Superb, well-balanced nebari measuring about 520 x 330 mm. A high-quality specimen for collectors who will take the time to prune it regularly to further densify the foliage pads. Appreciate the natural beauty of each trunk and the elegance of their curves. Wired in autumn 2025. Photographed in December 2025.
