Description

Artisanal 5-litre copper watering can imported from Japan. Sold with one rosette 4347. Container: Ø 185 mm, height: 180 mm. Length of spout: 700 mm. The container features a filter for sieving out impurities (clean, non-chalky water is preferable for cultivating small trees and bonsai). According to Japanese bonsai professionals, watering bonsai is one of the main skills to learn. It’s necessary to understand the tree to be able to judge its watering needs; it depends on the species, the earth, the weather, the amount of earth and the type of pot (enamelled or not).
