Description

My favorite! For caduc trees.
Ideal for your Acer, this revolutionary product guarantees fast and effective healing. Thanks to its unique properties and healing hormones, it is widely recognized for its impressive results on all properly cut, clean wounds. Content: 500 g pot Instructions for use: Preparation: Take a small amount of paste and knead it in your palm to soften it. Application: Spread a thin layer over clean, dry wound edges. Handy tip: To prevent the paste from sticking to your fingers, place a damp cloth over the mastic after applying it. This helps to press it down for better adhesion, ensuring an optimal result.
