

Satsuki bond 50 gr

› Bonsai tools › Bonsai cut paste

ref. 4416

[\[+\] Show on the website](#)

Description

Tube of 50 grams. This dough is specifically for healing the cut wounds of azaleas and rhododendrons. The branches of these plants must be cut absolutely flat, not dug into, otherwise it could heal badly or result in wood rot. Finish by grafting the wound and apply a fine layer of putty to guarantee good healing.
