

MAILLOT ERABLE

Hosta moonlight sonata

Hosta moonlight sonata

ref. 7137

[\[+\] Show on the website](#)

Description

Hosta 'Moonlight Sonata' is widely believed to be the earliest blooming, fragrant-flowered hosta. Its large perfumed open funnel-shaped blue-white flowers bloom in mid-July into August. The blue-green foliage is wavy, moderately rippled with a distinct tip.

Leaves 25 cm long x 18 cm wide.

Adult height: 50 cm high, 125 cm wide.

Descended from a hybridization of 'Invincible' and 'Northern Halo'.

Big rhizome delivered in a 1.5 litre plastic container.
