Description

Made in Japan, this copper rosette pours the finest rain out of all our range of interchangeable spouts. It has an inclined 30/35 mm head and an interior diameter of 12/13 mm. It matches our Japanese copper 2 and 4-litre watering cans. The holes are pierced with a lazer resulting in an even and regular jet of water more appropriate for bonsai.

Our watering can roses are handcrafted and may therefore show slight irregularities that reflect their manual production.
