

MAILLOT ERABLE

Ulmus parvifolia yuzen 3030186

Ulmus parvifolia yuzen

ref. 9890

[\[+\] Show on the website](#)

Description

Height of the tree without its pot : 370 mm. Width of the branches : 350 mm.

Japanese enameled pottery of : 335 x 260 x 60 mm. Ishitsuki style.

Very beautiful bonsaï with its perfectly-formed bark, planted on rock with a beautiful roots' set without any strong cutting wounds nor strong wire marks.

It's a quality rock with clear grey parts.

Selected by Guy Maillot for the beauty of its bark and the rarity of this species in bonsaï. This tree is aged of more than 30 years old.

Yuzen species also called yuzen nire keyaki in japanese presents the distinctive feature of making a bark with little wings as the European spindle.

Photographed in march 2018 and with its foliage in june. Shelf non-included.
